MADE IN INDIA

## CCTV POLES

# FROSSKIN CCTV POLES

Designed to mount surveillance cameras at suitable heights for monitoring roads, public spaces, industrial facilities, parking areas, campuses and critical infrastructure.

## PURPOSE

### Support surveillance equipment

Mounts CCTV cameras and devices at optimal heights for maximum area coverage.

### Provide wider field of view

Elevated positioning delivers broader coverage and reduces surveillance blind spots.

### Protect cables through routing

Internal conduit routing through the shaft shields all networking and power connections.

### Enhance security monitoring

Enables effective traffic management, perimeter control and public safety surveillance.

### Enable additional device mounting

Supports wireless radios, speakers, lighting fixtures and communication equipment.

### Ensure long-term durability

Hot-dip galvanized steel construction withstands harsh outdoor conditions for 50+ years.

## TYPICAL EQUIPMENT

### CCTV POLE

- PTZ & BULLET CAMERAS
- CAMERA MOUNTING BRACKETS
- WIRELESS RADIO UNITS
- INTERNAL CABLE SYSTEM
- EARTHING ARRANGEMENT

## TYPES & CONSTRUCTION

# FROSSKIN CCTV POLES

Available in round and octagonal designs to suit different environments — from general surveillance to smart city and highway applications.

## KEY FEATURES

### Round poles — cylindrical design

Cost-effective and easy to manufacture for general-purpose surveillance applications.

### Round poles — circular cross-section

Ideal for parking areas, campuses, residential complexes and general outdoor use.

### Octagonal poles — tapered design

Higher strength-to-weight ratio with a modern finish for urban environments.

### Octagonal poles — smart city ready

Preferred for highways, urban surveillance networks and critical infrastructure projects.

### Hot-dip galvanized steel body

Provides deep corrosion resistance for 50+ years in all outdoor conditions.

### Powder coating for protection

Additional weather and UV protection with a clean, professional aesthetic finish.

**Height Range:** 3M to 12M

**Material:** Galvanized Steel

**1U = 44.45mm**

## COMBINED ROLE IN OUTDOOR SURVEILLANCE

- Provide a stable and elevated platform for cameras and communication devices
  - Ensure optimal camera height and field of view for effective area monitoring
  - Protect internal cabling through concealed conduit routing in the pole shaft
  - Support long-term durability through hot-dip galvanized steel construction
  - Enable installation of radios, speakers, lighting and additional devices
-
